What's Inside

Part 1: Foundation: Before You Outreach

- Step 1: Your Profile Is Your Landing Page
- Step 2: The LinkedIn Algorithm in 2026
- Step 3: Content as Your Outbound Engine
- Step 4: Build Your Offer Ladder
- Step 5: Get Your Team Posting
- Step 6: The Content + Outbound Flywheel
- Step 7: The Capture System
- Step 8: Cold Email vs LinkedIn: When to Use Which

Part 2: Outreach Principles (Data-Backed)

- 8 principles from 100,000+ LinkedIn DMs analyzed
- Campaign structure best practices
- The 3-touch DM flow
- Copywriting formats that convert
- Key metrics to track

Part 3: The 7 Workflows

- Workflow 01: LinkedIn Ad Engagers
- Workflow 02: LinkedIn Harvesting (Content Engagers)
- Workflow 03: Event Attendees
- Workflow 04: Keyword Engagers
- Workflow 05: Followers Outreach
- Workflow 06: Competitor Followers
- Workflow 07: Decision Maker Connect

What's Inside

Part 4: How the Workflows Connect

- Scoring and tiering your engagers
- CRM setup: protecting your relationships
- Waterfall enrichment: from 50% to 85%+ coverage

Part 5: The Complete Tool Stack

- Tools by category
- LinkedIn outreach platform comparison
- Signal detection tool comparison
- Data enrichment tool comparison
- Recommended stack for most teams

Part 6: Claude for LinkedIn

- Claude Code for outreach automation
- Claude for LinkedIn content (4 prompts)

Part 7: Outreach That Converts

- What to say and what never to say
- Message templates per workflow
- Reply rate benchmarks

Part 8: The 30-Day Activation Plan

- Week by week breakdown
- End of month 1 targets

WHY THIS PLAYBOOK IS DIFFERENT

Most LinkedIn playbooks give you content tips. This one gives you a system.

There's a reason most LinkedIn advice is trash, they're too generic.

Tips about optimizing your headline don't book meetings. A repeatable signal-to-outreach system does.

With 65M+ decision-makers active on LinkedIn every month, most B2B teams treat it as a branding channel. The ones generating a consistent pipeline treat it as a system.

What you're about to read is the exact system SalesCaptain uses to generate \$1M+ in pipeline exclusively from LinkedIn. It's built around 7 specific workflows, each triggered by a real signal, each connected to a motion, each running on tools we actually use.

1.5M

impressions in 1 year

20K+

followers

22+

meetings/month

\$1M+

pipeline from LinkedIn

Content performance ⓘ

1,515,967

Impressions

▲83.5% vs. prior 365 days

Cumulative ▾

What makes this different from every other LinkedIn guide:

- 7 specific workflows: not advice, actual signal → motion → tools systems
- 1.5M impressions and \$1M+ pipeline: real numbers from SalesCaptain's own LinkedIn
- 79% ICP fit on inbound leads: the system attracts the right buyers, not just volume
- The content + outbound flywheel: most guides treat these separately
- The Claude Code automation layer: nobody else has documented this for LinkedIn
- 2026 algorithm update: the feed changed. Most playbooks haven't caught up

PART 1: FOUNDATION: BEFORE YOU OUTREACH

Step 1: Optimize Your Profile

Every prospect you reach out to will check your profile first. If it doesn't explain who you help and what you do in under 5 seconds, you lose them before the conversation starts.

Element	What it should do	Example
Headline	Who you help + how + proof	Founder Helping B2B SaaS teams book 5× more meetings
Banner	One clear CTA that matches your content	'Book a free strategy call' , same CTA across all 3 sections
Featured	A lead magnet solving one narrow, painful problem	Your playbook, cheat sheet, or case study
About	Written for them. How you help them win.	Pain + Promise + CTA. No company history.
Photo	HD, solid background, no selfies	Professional headshot , first impressions matter

Profile Rule

- Banner, featured section, and button should all point to the same CTA
- Three different destinations = three chances to confuse and lose them.

Step 2: Understand the LinkedIn Algorithm in 2026

LinkedIn's algorithm changed significantly in 2026.

The feed is now persona-based, not network-based. LinkedIn's LLM groups you with people similar to you and shows your content to those groups, even people who don't follow you yet.

What changed and what it means for you:

- Your content can now reach buyers who have never heard of you , if it matches their interests
- Generic content gets filtered faster than before
- Engaging with ICP content signals to LinkedIn who to show your content to
- Consistency beats virality , the algorithm rewards regular posting over one-off spikes

How to optimize for the 2026 algorithm

- Use the right keywords in your profile, the LLM reads them to classify you
- Engage intentionally with ICP posts, not just your network
- Create content specifically for your buyer's problems and language
- Post at minimum 2x per week to stay visible

Step 3: Content as Your Outbound Engine

Content warms your audience before you send a message.

By the time you reach out, they've already seen your thinking and your results. You're not cold. You're familiar.

Type	What to post	% of total
TOF , Reach	Thought leadership, trends, storytelling, company updates	40%
MOF , Trust	Demos, playbooks, how-tos, problem-solution breakdowns	40%
BOF , Conversion	Case studies, testimonials, results, product launches	20%

Winning hooks (from high-performing posts):

- Number + result: "Booked 112 meetings in 30 days, here's how"
- Milestone: "\$966K ARR from 3 emails"
- Contrarian: "Cold email isn't dead. Lazy cold email is dead."
- Process: "We spent 3 months figuring out how a GTM team should use Claude Code"

The 90:20 Rule

- 90% of your LinkedIn growth comes from 20% of your posts
- Pull your last 90 days , find posts that got 2x+ your normal reach
- Ask: was it the topic, the hook, the format, or the visual?
- Create 3 variations of what worked and test immediately
- Double down on outliers , average performance doesn't matter

Format rotation:

- Carousels: highest save rate, teach frameworks visually
- 60-second videos: highest reach with the new algorithm
- Playbooks and cheat sheets: highest download rate
- Text posts with strong hooks: fastest to produce, high engagement rate

Daily engagement checklist (10 minutes):

- Engage with 5 ICP posts, comment with genuine insight, not just reactions
- Check Sales Navigator for new signals and job changes
- Monitor profile viewers via Teamfluence
- Check Trigify for new engagers on your content

Step 4: Build Your Offer Ladder

Vague offers don't convert.

Before you build any outreach workflow, you need to be specific about what you're offering at every stage of the buyer journey.

Tier	Offer	Price	Purpose
Free	Lead magnets, playbooks, templates	\$0	Prove you know what you're talking about
Low ticket	Courses, communities	\$50–\$500	Help them get a quick win, build trust
Mid ticket	Cohorts, done-with-you programs	\$1K–\$5K	Deeper transformation, more accountability
High ticket	Done-for-you, retainers	\$5K+	Complete solution, your time involved

VAGUE OFFER

"I help founders grow"
"We do outbound"
"We build your pipeline"

SPECIFIC OFFER

"Get your first 10 qualified meetings in 30 days"
"54 intent signals stacked before a single email, \$3M pipeline in 90 days"
"First positive replies in 14 days or we rebuild the system free"

Step 5: Get Your Team Posting

One person posting on LinkedIn is a content channel. A team posting on LinkedIn is a distribution network.

At SalesCaptain, 8 client-facing team members post on LinkedIn. We incentivize with competitions and cash prizes. Bill hit 1.5M impressions and 20K+ followers in 1 year, generating 150+ inbound leads, 79% within ICP, and \$1M+ in pipeline directly attributable to LinkedIn.

HOW TO BUILD POSTING CULTURE

→ Run weekly competitions, most impressions, most comments, most saves

THE TEAM FOLLOWER HACK

→ Export entire team's LinkedIn followers into Clay
→ Enrich and filter against your ICP criteria

- Give team hooks and angles , let them write in their own voice
- Repurpose best-performing posts across team with different openings
- Target 10+ posts per week combined
- Celebrate wins publicly in Slack

- Remove existing clients, competitors, current prospects
- Reach out to qualified followers once a quarter
- Use team followers as a LinkedIn Ads retargeting audience

Step 6: The Content + Outbound Flywheel

LinkedIn's real power isn't content or outbound. It's both working together. Here are the two buyer journeys:

Journey 1: Outbound → Content → Conversion

1. Prospect receives your outbound email
2. Connect request sent automatically
3. They see your content while evaluating
4. Flagged as high-priority
5. Hands-on conversion sequence triggered

Journey 2: Content → Outbound → Sales Call

1. Prospect sees your content, hits follow
2. Starts seeing team members' posts too
3. Engages with a post a few days later
4. Engagement triggers automated outbound
5. Sales call booked

Both channels working together create a flywheel. Neither works as well alone.

Step 7: The Capture System

Most teams post content, get engagement, and do nothing with it. The capture system converts LinkedIn engagement into an owned audience you can nurture and reach out to before your competitors even know those people exist.

Tool	What it captures	How to use it
Trigify	Post engagers in real time	Route to Clay for enrichment and qualification
Teamfluence	Profile viewers	Identify who's checking you out before they act
RB2B	Website visitors from LinkedIn traffic	Deanonymize inbound from your LinkedIn content
beehiiv	Email subscribers via lead magnets	Build owned audience independent of LinkedIn
Cal.com/Calendly	Direct bookings	Let high-intent prospects book without friction
LinkedIn Export	Your connection list	Export and enrich your full network in Clay quarterly

Cold Email vs LinkedIn: When to Use Which

Factor	Cold Email	LinkedIn
Core focus	Book meetings / educate with lead magnets	Start conversations / nurture existing leads
Volume	50-100 emails per inbox per day	100 DMs + 100 connections per week
Tone	Formal and direct	Personal and conversational
Reply rate	Lower , easier to scale	Higher , limited by platform
Best audience	Anyone who opens emails	People in tech, sales, marketing
Challenges	Spam filters, crowded inboxes	Connection and DM limits

The combination that works

- LinkedIn warms the prospect, email converts them
- Adding email follow-up after no LinkedIn reply = +13.8% more replies
- LinkedIn accounts × 600 = your monthly connection capacity , plan accordingly

PART 2: OUTREACH PRINCIPLES (DATA-BACKED)

These 8 principles come from the analysis of 120,000+ LinkedIn DMs. Not opinions. Data.

#	Principle	What it means	Data
1	Personalization > Volume	ICP-specific copy beats batch-and-blast every time	+54.7% replies
2	Short wins	Under 150 characters. One screen. No walls of text.	+22% reply rate
3	Context is king	Reference recent posts, role changes, company news	+18% replies
4	Soft touchpoints first	Visit → Like → Follow → Connect before messaging	+30.2% acceptance
5	Smart sequencing	3-5 steps consistently beat single messages	+42% better
6	Omnichannel > single thread	Add email after no LinkedIn reply for a significant lift	+13.8% lift
7	Sentiment routing	Detect and route based on reply sentiment	+35% efficiency
8	No generic pitches	ICP-specific CTAs and trigger-based openers win	Consistent winner

The 3-Touch DM Flow

Day	Touch type	What to send
Day 0	Contextual	Reference something real, a post they wrote, a role change, a company news item
Day 3	Soft CTA	Share something useful and relevant , a playbook, a relevant case study, a quick tip
Day 7	Reference ask	'Are you the right person to speak with about [topic]?' , easy out, high conversion

Key Metrics to Track

Metric	What it measures	Target
Connection acceptance	% who accept your request	40-55%
Reply rate	% of accepted connections who reply	18-27%
Positive reply	% showing buying intent	8-12%
Meeting rate	% of connections that book a call	5-15%

Copywriting Formats That Convert

Format	Example	Reply lift
Trigger-based hook	"Noticed you're hiring SDRs , what's worked best so far?"	+18.2%
Post reference	"Saw your post on PLG , curious what you're testing right now?"	+19.3%
Peer comparison	"Worth sharing what others in your space are doing?"	+27.1%
Job change hook	"Saw you joined [Company] , how's the first month going?"	+21.5%

PART 3: THE 7 WORKFLOWS

Each workflow follows the same structure: The Signal (what triggers it), The Motion (what happens next), The Tools (what runs it). Start with Workflow 02 , it's the fastest path to results.

WORKFLOW 01, LINKEDIN AD ENGAGERS

THE SIGNAL

Someone likes, comments, or shares your LinkedIn ad but never clicks. They engaged with your content but didn't convert , a warm signal most teams ignore.

TOOLS:

LinkedIn · Fibbler · ZenABM

THE MOTION

1. Capture company behind each engagement
2. Enrich and tier by ICP fit in Clay
3. Top 20% flagged to rep via Slack for manual outreach
4. Remaining 80% pushed to automated sequence

TOOLS:

Clay · HeyReach · Lemlist · Instantly

TIP: Running LinkedIn ads to a specific ICP list? Everyone who engages is a confirmed warm signal. Combine with ZenABM to push directly to a Clay table.

WORKFLOW 02: LINKEDIN HARVESTING (CONTENT ENGAGERS)

THE SIGNAL

A prospect engages with your LinkedIn content 3+ times. Repeated engagement is a buying signal, they keep coming back to your thinking.

TOOLS:

Trigify · Teamfluence

THE MOTION

1. Detect 3rd engagement trigger via Trigify
2. Classify ICP fit in Clay
3. Find the key contact at their company
4. Auto-DM on LinkedIn
5. Follow up with relevant email

TOOLS:

Clay · HeyReach · Lemlist

TIP: Don't reference the specific post in your message. Use the topic as context, not evidence. 'I've been posting a lot about [topic] lately, is this something you're actively working on?'

WORKFLOW 03: EVENT ATTENDEES

THE SIGNAL

New LinkedIn events and webinars in your space go live every week. People attending events on your topics are actively looking for solutions.

TOOLS:

LinkedIn · Clay

THE MOTION

1. Detect new events every Monday
2. Find attendees registered to each event
3. Classify into Tier 1, 2, or 3 by ICP fit
4. Reach out on LinkedIn before competitors do

TOOLS:

Phantombuster · Clay · HeyReach

TIP: Never say 'I saw you attended [Event Name]'. Use the topic of the event to find a relevant angle instead. The signal informs targeting, never the message.

7 LINKEDIN WORKFLOWS

WORKFLOW 03 EVENT ATTENDEES

THE SIGNAL:

Every Monday: new LinkedIn events and webinars in your space go live.

TOOLS:

THE MOTION:

Detect new events every Monday

↓

Find attendees to each event

↓

Classify into Tier **1 / 2 / 3**

↓

Reach out on **LinkedIn** before competitors

TOOLS:

03/07

WORKFLOW 04: KEYWORD ENGAGERS

THE SIGNAL

Someone posts or comments about the exact problems you solve on LinkedIn. This is the highest-intent signal available, they're describing your value proposition in their own words.

TOOLS:

Trigify · Teamfluence

THE MOTION

1. Social listening detects post or comment with target keywords
2. Find the person and classify ICP fit
3. Send LinkedIn DM with contextual relevance
4. Follow up with a relevant email if no reply

TOOLS:

Clay · HeyReach · Lemlist

TIP: The lead magnet latch: when a competitor drops a lead magnet with 500+ comments, extract all commenters, they raised their hand on your topic. We see 20-50% reply rates on these lists.

7 LINKEDIN WORKFLOWS

WORKFLOW 04 KEYWORD ENGAGERS

THE SIGNAL:

Someone posts or comments about the exact problems you solve on LinkedIn.

TOOLS:

THE MOTION:

Social listening detects post or comment

Find the person + classify ICP

Send LinkedIn DM with context

Follow up with relevant email

TOOLS:

04/07

WORKFLOW 05: FOLLOWERS OUTREACH

THE SIGNAL

Someone follows your LinkedIn page. They know who you are and what you do. They just haven't acted yet, your warmest cold outreach list.

TOOLS:

LinkedIn

THE MOTION

1. Export new followers list
2. Enrich and classify ICP fit in Clay
3. Personalize based on their recent LinkedIn activity
4. Reach out via LinkedIn DM and email

TOOLS:

Clay · Lemlist · Instantly

TIP: If you're not reaching out to your entire LinkedIn following at least once a quarter, you're leaving pipeline on the table. Combine your whole team's followers for a significantly larger warm list.

7 LINKEDIN WORKFLOWS

WORKFLOW 05 FOLLOWERS OUTREACH

THE SIGNAL:

Someone follows your LinkedIn page. They know who you are, they just haven't acted yet.

TOOLS:

THE MOTION:

TOOLS:

05/07

WORKFLOW 06: COMPETITOR FOLLOWERS

THE SIGNAL

Someone is following your competitor on LinkedIn. They're already in the market, they know the category and haven't chosen you yet.

TOOLS:

LinkedIn · Clay

THE MOTION

1. Find competitor's LinkedIn followers
2. Classify ICP fit in Clay
3. Identify their likely pain points with the competitor
4. Reach out via email + LinkedIn

TOOLS:

Clay · HeyReach · Lemlist

TIP: Never reference the competitor in your message. Use it to target, not to write. Run this weekly, new followers are the freshest signal.

7 LINKEDIN WORKFLOWS

WORKFLOW 06 COMPETITOR FOLLOWERS

THE SIGNAL:

Someone is following your competitor on LinkedIn. They're already in the market

TOOLS:

THE MOTION:

Find competitor's LinkedIn followers

↓
Classify ICP fit in  clay

↓
Identify top pain points with competitor

↓
Reach out via email + 

TOOLS:

06/07

WORKFLOW 07: DECISION MAKER CONNECT

THE SIGNAL

Someone books a meeting with your team. A single contact booking means there's a buying committee behind them, reach all of them before the meeting happens.

TOOLS:

Calendly · HubSpot

THE MOTION

1. Meeting booked triggers Clay workflow
2. Find the full buying committee at the company
3. Auto-connect with all decision-makers on LinkedIn
4. Add all contacts to CRM call queue

TOOLS:

Clay · HeyReach · HubSpot · Salesforce

TIP: By the time your meeting happens, the buying committee already knows who you are. They've seen your content. You walk into the call with brand awareness instead of starting from zero.

7 LINKEDIN WORKFLOWS

WORKFLOW 07 DECISION MAKER CONNECT

THE SIGNAL:

Someone books a meeting with your team.

TOOLS:

THE MOTION:

Meeting booked
→ clay triggers

Find full buying committee

Auto-connect with all of them on
LinkedIn

Add to CRM call queue

TOOLS:

07/07

PART 4: HOW THE WORKFLOWS CONNECT

The 7 workflows aren't meant to run in isolation. They feed each other. A follower becomes a content engager. A content engager becomes a meeting. A meeting triggers the buying committee workflow.

Scoring and Tiering Your Engagers

Tier	Criteria	Outreach motion
Tier 1	Top ICP fit + high engagement signal	Manual rep outreach , personal DM + email + call
Tier 2	Good ICP fit + some engagement	Multichannel automated , DM + email sequence
Tier 3	Lower fit or low engagement	Email sequence only , test and learn

Waterfall Enrichment , From 50% to 85%+ Email Coverage

Step	Provider	Role
1st pass	Findymail or Prospeo	Cheapest, covers ~50-60% of contacts
2nd pass	LeadMagic or FullEnrich	Catches misses from first provider
3rd pass	Hunter or Apollo	Final catch for remaining gaps
Validation	ZeroBounce	Clean before sending , remove invalid emails

PART 5: THE COMPLETE TOOL STACK

Every tool mentioned in this playbook, organized by what it does and when you need it.

Tools by Category

Category	Tools	What they do
Signal Detection	Trigify · Teamfluence · Fibbler · ZenABM	Capture post engagers, profile viewers, ad interactions in real time
Capture System	RB2B · beehiiv · Cal.com	Deanonymize visitors, capture emails, enable direct booking
Data Orchestration	Clay · Apollo · Sales Navigator	Enrich, qualify, tier, and route all contacts
LinkedIn Outreach	HeyReach · Expandi	Multi-profile LinkedIn DM and connection campaigns
Email Outreach	Lemlist · Instantly	Multichannel sequences, deliverability, analytics
Email Enrichment	Findymail · Prospeo · LeadMagic · FullEnrich	Waterfall enrichment for maximum coverage
CRM	HubSpot · Salesforce · Close · Attio	Dedup, routing, deal tracking, activity logging
Automation	n8n · Claude Code	Workflow orchestration and scheduling
Content Creation	Taplio · Scripe · Favikon · Claude	Ideation, scheduling, outlier analysis

Tool Comparison: LinkedIn Outreach Platforms

Choosing the right LinkedIn outreach tool depends on your team size, budget, and how many profiles you're running. Here's how the main options compare:

Tool	Best for	Pricing model	Key strength	Limitation
HeyReach	Agencies + teams	Flat fee per seat	Unlimited LinkedIn profiles, bulk campaigns	No email outreach built in
Expandi	Solo founders	Per user	Deep personalization, smart sequences	Slower at scale
Lemlist	Multichannel teams	Per seat	Email + LinkedIn + WhatsApp + calls in one	More expensive at scale

Tool	Best for	Pricing model	Key strength	Limitation
LinkedIn Sales Nav	Research + prospecting	Per seat	Best data quality, search filters	Outreach still manual

Tool Comparison: Signal Detection

Tool	Signal type	What it detects	Best use case
Trigify	1st party	Post engagers, profile interactions	Content engagement → outreach
Teamfluence	1st party	Profile viewers, connection signals	Warm outreach to people checking you out
Fibbler	2nd party	LinkedIn ad engagers	Ads → outreach workflow (Workflow 01)
ZenABM	2nd party	Ad engagement by company	ABM ad campaigns → Clay enrichment
RB2B	1st party	Website visitors from LinkedIn	Deanonymize inbound traffic

Tool Comparison: Data Enrichment

Tool	Pricing model	Coverage	Best for
Clay	Credits	100+ sources in one	Full enrichment orchestration , waterfall logic built in
Findymail	Pay per email	60-70%	1st pass in waterfall , cost-effective
Prospero	Credits	65-75%	Strong B2B coverage, good for 1st-2nd pass
FullEnrich	Credits	70-80%	2nd-3rd pass , catches what others miss
LeadMagic	Credits	65-75%	LinkedIn-specific enrichment
ZeroBounce	Credits	Validation	Clean your list before sending , non-negotiable

The recommended stack for most teams

- Clay for orchestration (connects everything)
- Findymail or Prospeo as 1st pass
- FullEnrich or LeadMagic as 2nd pass
- ZeroBounce for validation before sending
- HeyReach for LinkedIn outreach at scale
- Lemlist for multichannel sequences (email + LinkedIn + WhatsApp)

PART 6: CLAUDE FOR LINKEDIN

Claude adds two layers to your LinkedIn system: automation of the outreach workflows, and a content engine that makes consistent posting achievable for any team.

A: Claude Code for Outreach Automation

Claude Code connects the full outreach loop , scrape, enrich, qualify, route, and outreach , without manual work. Once set up, workflows run automatically on a schedule you define.

What Claude Code automates per workflow

- Workflow 02: Detects engagement triggers from Trigify → enriches in Clay → routes qualified to HeyReach
- Workflow 05: Exports follower list → enriches and filters ICP → pushes to DM sequence
- Workflow 07: Meeting booked → finds buying committee → pushes to LinkedIn connect sequence
- Scheduling: /loop command runs any workflow automatically , hourly, daily, or weekly
- Cost: running all 7 workflows costs under \$50/month in Claude API costs

B: Claude for LinkedIn Content

Four prompts that cover the entire content process , from analyzing what worked last month to making sure your next post doesn't sound like AI wrote it.

Prompt	What it does	When to use it
Content Audit	Reviews last month's posts and numbers. Tells you what worked, what didn't, what to change.	Monthly , before planning next month
Viral Post Reverse	Paste any post that performed well. Claude breaks down why and rebuilds the structure for your niche.	When a post hits 2x+ your normal reach
Repurpose Content	Paste anything. Claude turns it into 3 LinkedIn posts, a carousel outline, a video script, and an email opener.	After any long-form content , podcast, webinar, article
Caption Reviewer	Flags every AI-sounding line, weak sentence, and reframe before your post goes live.	Before every single post , non-negotiable

PART 7: OUTREACH THAT CONVERTS

The message is the last thing you should worry about. Get the targeting right first. Then timing. Then write the message. Most teams do this backwards.

What to Say and What Never to Say

WHAT WORKS

- ✓ Keep it under 150 characters
- ✓ Reference their role, company, or a relevant topic
- ✓ Ask one question , not three
- ✓ Give them an easy out
- ✓ Use a PS line to add context without cluttering the main message
- ✓ Make it feel like you chose them specifically

WHAT NEVER WORKS

- ✗ I saw you liked my post...
- ✗ I noticed you attended [Event Name]...
- ✗ Hi, I'm [Name] from [Company], we do...
- ✗ Would love to hop on a 15-minute call
- ✗ Generic openers like 'I hope this finds you well'
- ✗ Walls of text , they don't read them

Message Templates

Content engager (Workflow 02):

"Hey [Name], I've been posting a lot about [topic] lately , curious if it's something you're actively working on or more of a future thing?"

Why it works: topic-based opener, single question, no pitch, no mention of the specific post.

Keyword engager (Workflow 04):

"Hey [Name], saw you're working on [relevant topic] , is [specific problem] something you're trying to solve right now or further down the roadmap?"

Why it works: shows awareness of their situation, one binary question, easy to say yes or no.

Followers (Workflow 05):

"Hey [Name], hoping some of the content on [topic] has been useful , are you currently running any [relevant motion] at [Company]?"

Why it works: assumes they've seen the content naturally, no forcing, one qualifying question.

PART 8: 30-DAY ACTIVATION PLAN

Don't try to run all 7 workflows on day one. Build sequentially. Each week adds a new layer on top of what's already working.

Week	Focus	Actions
Week 1	Foundation	Optimize profile · Set up Clay ICP table · Connect HeyReach · Post 2x/week · Set up Trigify
Week 2	First workflow	Launch Workflow 02 (Content Engagers) · Build enrichment table · Start 3-touch DM sequence · Review metrics daily
Week 3	Add layers	Launch Workflow 05 (Followers) · Launch Workflow 04 (Keyword Engagers) · Add email follow-up
Week 4	Automate	Launch Workflow 01 (Ad Engagers) if running ads · Launch Workflow 06 (Competitor Followers) · Connect Claude Code · Review all metrics

End of Month 1: Targets to Hit

- Connection acceptance rate: 40-55%
- Reply rate: 18-27%
- Positive reply rate: 8-12%
- Meetings booked: 10-20+ per month
- Content posts published: 8-12 across all formats
- Workflows running: at least 3 of the 7

Want This Built for You?

Every workflow in this guide has been built, tested, and refined across 70+ client engagements.

We apply these systems in a modular way (customised to your ICP, your stack, and your motion) which is why we have the highest client retention in the market.

Book a call with the SalesCaptain team

We will map out the 2 to 3 workflows with the highest ROI for your current stage and show you exactly how we would build them
